

AgroLiquid Offers PNDSA Members a Rebate on High-Efficiency Crop Nutrients

Public scrutiny, consumer demand, corporate transparency, and high production agriculture seldom align. The pressures upon the American farmer are often unfair and burdensome. But, the legitimacy of societal concern is real, and the issues that negatively impact our environment, resulting from poor agricultural practices must be addressed. Farmers understand this and are leading the charge for sustainable change.

AgroLiquid is also committed to bridging the gap between consumers, environmental groups, regulatory agencies, and production agriculture. Driven by the desire to help the farmer prosper, AgroLiquid products are developed upon principles of nutrient synergy, sustainability, and practical agronomy. We're researching, developing, and bringing exciting new technologies to the farm gate that meet the challenges farmers face today.

Recognizing the similar goals and objectives of the Pacific Northwest Direct Seed Association, AgroLiquid has chosen to partner with PNDSA by offering a rebate on AgroLiquid products to Association members, through June 30, 2017. AgroLiquid will rebate PNDSA growers \$0.025/gallon, and PNDSA will receive \$0.025/gallon for all AgroLiquid product purchased before the end of this program. In addition, AgroLiquid will reimburse PNDSA \$250 per new, qualifying Farmed SMART Sustainable Ag certification obtained before June 30, 2017.

For more information on the rebate program contact AgroLiquid Sales Account Manager Eric Collins at 360-325-5655 or Sales Account Manager Bruce Keck at 208-240-1968. Find an AgroLiquid Retail Partner near you at <http://www.agroliquid.com/contact-us/>
